

EXHAUST

FLAME OF BURNING FIRE

LIGHTSTORM

I saw you there
A ray of light
Who's glowing slightly in the crowd

So many stars are in the dark
They all are waiting for a light

Lightstorm - sparkling in the sky
Lightstorm

Lightstorm - echoes of the waves
Lightstorm

Lightstorm - shining in the universe

There's silence in the darkness here
But I will find your ionosphere
I send a message up to the sky -
A thousand miles away

I'm searching in the skies for your light
I'd like to watch you shining bright
I can see your stardust silver lightning -
And here you come

Lightstorm - sparkling in the sky
Lightstorm - a beautiful beacon
Lightstorm
