

EXHAUST

FLAME OF BURNING FIRE

AGE OF SOLARITY

One of a billion sleeping
Calm in the dark I'm waiting
When comes the sunshine of my life

I like to pulse and move around
500 seconds for one round
I'm longing for the rays of dawn

He likes to surf on solar waves
With speed of light he hits my place
The photon helps me on my way

Bring Bring Bring
Bring me... Bring me right into life
Ooh, I have to move
Can't resist to the light
Ooh, I can't prevent it -
Ooh, I gotta go
I like the Age of Solarity

My motor's running without stop
There's only one way left to go
I'm trembling with velocity

I see the light, I feel the heat
I realise the energy
I love the stream that's pulsing
powerful through me

Bring Bring Bring
Bring me... Bring me right into life
Ooh, I have to move
Can't resist to the light
Ooh, I can't prevent it
Ooh, I got to go
I like the Age of Solarity

Then we come together... magical!
Sparks are flying and the stream is on
Restless part of sunlight energy
Everyone needs current flow to be

This is the dawning of the Age of Solarity
This is the dawning of the Age...
I like to pulse and move around
Together we are so much more
My motor's running without stop
I can't prevent, I got to go

Together we are so much more
There's only one way left to go
I can't resist, I can't ignore
This is the dawning of the Age of Solarity
This is the dawning of the Age...

Imagine to be a photovoltaic electron:
That's what you feel during night and day
