

EXHAUST

RIDE ON FROZEN GROUND

CENTER OF THE DAWN

Each day we're learning to survive
But we know we won't arrive
The aim of our journey is too far
Living here in space and time
There are so many things to find
The hunters and collectors do their job
We got the fire and the wheel
We're using tools to make it real
We're sending mankind into space
We got the fuel, we're on the way
You won't believe it, but today
We're in the center of the dawn

**It's a long way back
The Center of the Dawn
A journey without end**

Survival is a normal thing
The wishes grow and bring within
That jealousy can't reach the arrogance
We're travelling in space and time
But we know we won't arrive
The aim of our journey is too far
We got the fuel, we're on the way
You won't believe it, but today
We're in the center of dawn

**It's a long way back
The Center of the Dawn
A journey without end**

And one day, not too far away
We pass, our storyline ends
We leave our legend behind
We give, what's on our mind
One day our storyline ends
And the journey goes on and on

The day of reckoning will come
